## Medium Voltage Distribution Transformer

- up to 34.5kV

power to perform

# HPS Millennium™ E

## Medium Voltage Transformer

## HPS MILLENNIUM™ E

Hammond Power Solutions (HPS) is the industry leading manufacturer of standard and custom dry-type transformers in North America. Every HPS product is built with the quality and dependability you count on.

HPS Millennium™ medium voltage distribution transformers are designed for many demanding and diverse applications, while minimizing both installation and maintenance costs. Coils are precision wound with copper or aluminum conductors using either barrel or comb wound designs with a full vacuum-pressure impregnation (VPI) insulation system.

With three phase ratings up to 15MVA, 34.5kV, 175kV BIL and single phase to 5MVA, they feature the newest technology and manufacturing processes.

To service all of your medium voltage needs, HPS Millennium™ G is also available for applications requiring voltages up to 5kV. For more information on HPS Millennium™ G (catalog no. MILGMED), please contact us or visit the HPS Website.

## SUPPORT & RESOURCES

No other transformer company can offer our service and quality in a full range of products:

**Current Calculator:** Calculate the Amps, Volts, or kVA of a transformer. Visit the "Online Tools" area of the HPS website.

**Fast On-Site Response:** On-site technicians are available to assist with any technical problems or issues that cannot be resolved over the phone.

**Live Telephone Technical Support:** Our inside sales team is available to quickly answer your questions. They are technically trained and able to answer most questions right over the phone.

**Easy-To-Access Installation Manuals:** All transformer installation manuals are conveniently located on our website so you can access them anywhere, anytime.

**Online Technical Support:** Get answers to frequently asked questions, troubleshooting tips and instruction sheets by visiting the "Technical Support" area of the HPS website.

## APPLICATIONS

HPS Millennium™ E is suitable for any commercial, industrial, manufacturing or production process application. They can be offered for a variety of environmental conditions and built to meet the most onerous duty.

- Industrial
- Commercial
- Data Centers
- Renewable Energy

Built-in enclosure fork lift capability

Low voltage bus bar

Flexible connectors

## FEATURES

### Core & Coil Construction:

- Manufactured from quality non-aging, cold rolled, silicon steel laminations
- Cores are precision cut to close tolerances to eliminate gaps and improve performance
- Core is coated to prevent the ingress of moisture
- Precision wound with copper or aluminum conductors that are electrically balanced to minimize axial forces during short-circuit conditions
- Wire or foil conductors for optimum performance for the application
- Robust interface between core & coils for better short circuit performance
- Utilize both barrel or comb wound construction techniques
- Available with multiple termination configurations: stubs-up, coordinated bus-to-end
- Vibration isolation pads to minimize noise

## BENEFITS

- Meets the minimum efficiency standards mandated in DOE 10 CFR Part 431 (levels as of Jan. 1<sup>st</sup> 2016), NRCAN 2019 SOR/2018-201 Amd. 14, ON Reg. 404/12 (effective Jan. 1<sup>st</sup>, 2018) and exceeds CSA C802.2-12 resulting in increased dollar savings and positive societal/environmental payback
- Designed for indoor or outdoor applications
- VPI windings are mechanically durable for the most demanding environments typically found in mining, crane and other difficult mechanical applications.
- Minimal maintenance required beyond removing surface contaminants, such as dirt
- Can be energized immediately after installation
- Excellent resistance to short circuits
- Self-extinguishing in the unlikely event of fire
- Environmentally friendly

## Medium Voltage Transformer

### Specifications - Copper or Aluminum

<b>kVA:</b>	225-2500kVA (DOE16) 225-7500kVA (NRCAN 2019) others available upon request	<b>Temperature Rise:</b>	150°C typical temperature rise, (optional 115°C & 80°C rise available)
<b>High Voltage (Primary):</b>	Up to 34.5 kV Class, up to 175 kV BIL Up to 150 kV BIL (BIL per CSA and IEEE/ANSI standards) Standard taps +/- 2.5%, +/- 5% Other options available upon request	<b>Termination:</b>	Front accessible separate high and low voltage terminals; connectors suitable for aluminum and copper are provided for easy cable installation.
<b>Low Voltage (Secondary):</b>	208Y/120V to 600Y/347V & 2.4-5kV up to 60kV BIL Higher BIL available upon request	<b>Impedance:</b>	3-7%, typically 5.75%
<b>Frequency:</b>	60 Hz, others available upon request	<b>Seismic:</b>	Seismically qualified according to the International Building Code (IBC) 2018, and the American Society of Civil Engineers ASCE 7-16 specifications, with the following design parameters: Spectral acceleration: $S_{DS} \leq 2.0$ g Importance factor: $I_p = 1.5$ Attachment/height ratio: $z/h = 0$ OSHPD compliance available upon request
<b>Insulation System:</b>	220°C (200°C for some lower kVA ratings)	<b>Sound Level:</b>	Meets IEEE C57.12.01 (other sound level performance available)
<b>Enclosure Type:</b>	Type 1, 2, 3/3R, 4/4X or 12 available (others available upon request). Enhanced Type 3R option available for improved outdoor performance. Lift off hinged doors for easy accessibility and quick removal if required. Built-in enclosure fork lift capability.	<b>Altitude:</b>	Standard up to 1000 meters (de-rated above 1000 meters)
<b>Enclosure Finish:</b>	ANSI 61 Grey Compliant with UL 50	<b>Ambient:</b>	-20°C to 40°C (with de-rating possible from 40°C to 60°C, consult HPS)
<b>Neutral:</b>	Neutral terminal for field connection (on applicable units)	<b>Duty:</b>	Special duty available upon request.

& custom enclosure finish

Lightning arrestors

Cooling fans

### OPTIONAL ACCESSORIES

- Forced air-cooling (or provisions for later)
- Heat exchanger/cooling for TENV units
- Lightning arrestors rated for system voltage (Station, Intermediate or Distribution)
- Grounding resistor
- Neutral Ground Monitor
- Thermal sensing & indication
  - Thermocouples
  - Thermometers (analog/digital)
  - Thermostat alarm / trip (N.O. /N.C. contacts)
- Current transformers
- Potential transformers
- Key interlock to prevent unauthorized access
- Electrostatic shielding
- Rated to handle non-linear loads
- Strip heater (powered from separate source)
- Surge protection devices
- Air terminal chamber
- Low voltage panel
- Coordinated bus-to-end
- Primary fused disconnects
- Infrared viewing windows

## Comparison of Enclosures for Indoor and Outdoor Non-Hazardous Locations

		Indoor						Indoor/Outdoor								Submersible

	Oil and coolant seepage				X	X	X										
	Oil and coolant seepage, spraying and splashing						X										

### Notes:

- a. - These enclosures may be ventilated
  - b. - External operating mechanism(s) is not required to operate when the enclosure is ice covered
  - c. - External operating mechanism(s) shall be operable when the enclosure is ice covered
  - d. - These fibres and flyings are non-hazardous and are not considered Class III type ignitable fibres or combustible flyings
  - e. - Since IEC 60529 does not specify degrees of protection for many conditions considered CSA C22.2 No. 94.2, the IEC classifications cannot be exactly equated to North American Type numbers. The North American Type numbers meet or exceed the test requirements for the associated IP classifications.
- This table cannot be used to convert from IEC classifications to North American Type designations.

References: CSA C22.2 No. 94, CSA C22.1 (CEC), NEMA 250, NEMA document - NEMA Enclosure Types

Disclaimer: This table is for quick comparison only. Please refer to appropriate standard for enclosure selection to your needs.

## TESTING

All VPI Power transformers are tested at HPS prior to shipment. They must meet specific criteria to be certified acceptable for release. The following tests are performed on each power transformer:

- Resistance Measurement\*
- Voltage Ratio
- Polarity & Phase-Relation Test
- No-Load Loss and Excitation Current Test
- Induced Voltage
- Impedance, Voltage & Load Loss Test\*
- Power frequency voltage-withstand each winding
- Other testing available upon customer request

\* typically not performed for units  $\leq 500\text{kVA}$

## COMPLIANCE & APPROVALS

HPS Millennium™ E is CSA Certified and UL Listed to the following standards:

- CSA C22.2 No. 47
- CSA C9-02
- U.L. 1562

Compliant to the following industry standards:

- IEEE-C57.12.01
- IEEE-C57.12.51
- IEEE-C57.12.70
- IEEE-C57.12.91
- CSA 802.2-12
- DOE 10 CFR Part 431: 2010 or 2016
- NRCAN SOR/2018-201 Amd. 14
- ON Reg. 404/12 (2018)
- IEC 60076 (upon request)
- IBC 2018/OSHPD for seismic conditions

	34.5	150	108	72	110	16900	132	72	110	19000

Weight and dimensions are typical for 150°C Average Winding Rise.  
Weights and dimensions are for DOE 2016/NRCAN 2019 compliant product.  
All dimensions are in inches.  
For Type 2 enclosure styles, add 4 inches to the enclosure depth and 20 lbs to the total weight.  
Not for construction purposes. Approval drawings can be provided as needed.

Add 20 inch for ATC up to 110kV BIL designs and 24 inch for ATC with 125/150kV BIL designs.  
Add approx. 400 lbs. per ATC.

Weight and dimensions are typical for 150°C Average Winding Rise.  
Weights and dimensions are for DOE 2016/NRCAN 2019 compliant product.  
All dimensions are in inches.  
For Type 2 enclosure styles, add 4 inches to the enclosure depth and 20 lbs to the total weight.  
Not for construction purposes. Approval drawings can be provided as needed.

Add 20 inch for ATC up to 110kV BIL designs and  
24 inch for ATC with 125/150kV BIL designs.  
Add approx. 400 lbs. per ATC.

**ENCLOSURE WITH STUBS UP FIG. 1**

**ENCLOSURE WITH BUS-TO-END FIG. 2**

# Anti-Vibration Pad & Vibration Isolator Kits

## ANTI-VIBRATION PAD AND VIBRATION ISOLATOR KITS

All standard transformers come with installed internal vibration absorbing pads to minimize noise during operation. Optional external “anti-vibration” pad and “vibration isolator” (for higher noise dampening) kits can be used to reduce operating noise even further. All are resistant to industrial contaminants like oil, acids and alkalines.

### Anti-Vibration Pad Kits

Part No.	Description
PD1	Set of four (4) rubber anti-vibration pads which replace the standard steel enclosure washers.
PD2	

All anti-vibration pad kits contain a set of four (4) pads or isolators. Therefore only one kit is required per transformer.

### Vibration Isolator Kits

Part No.	Transformer Weight (Lbs)	Description
NMP1	Up to 340 lbs	Set of four (4) molded neoprene and steel plate assemblies that virtually eliminate vibration noise between the transformer and the mounting surface.
NMP2	341 to 680 lbs	
NMP3	681 to 1040 lbs	
NMP4	1041 to 1740 lbs	
NMP5	1741 to 2330 lbs	
NMP6	2331 to 3450 lbs	
NMP7	3451 to 4690 lbs	

All vibration isolator kits and anti-vibration pad kits contain a set of four (4) pads or isolators. Therefore only one kit is required per transformer.

## System Voltage and Transformer BIL Ratings

Nominal L-L System Voltage (kV)	Low Frequency Voltage Insulation Level (kV rms)	Basic lightning impulse insulation levels (BIL ratings) in common use kV crest <sup>a,b</sup> (1.2 x 50 µs)												
		10	20	30	45	60	95	110	125	150	200	250	300	350
0.25	2.5	None												
0.6	3	S	1	1										
1.2	4	S	1	1										
2.5	10		S	1	1									
5.0	12			S	1	1								
8.7	20				S	1	1							
15.0	34					S	1	1						
18.0	40						S	1	1					
25.0	50						2	S	1	1				
34.5	70								2	S	1			
46.0	95										S	1	1	
69.0	140											S	1	1
Chopped wave <sup>c,d</sup> minimum time to flashover µs		1.0	1.0	1.0	1.25	1.5	1.6	1.8	2.0	2.25	2.7	3.0	3.0	3.0

When performing an impulse test on the low voltage windings, the high voltage windings may experience higher test voltage than the rated BIL level.

Note - The latest edition of IEEE Std. C62.22™ [B3] should be consulted for information coordination with available surge arrester protection levels.

S = Standard values

1 = Optional higher levels where exposure to overvoltages occurs and improved protective margins are required.

2 = Optional lower levels where protective characteristics of applied surge arresters have been evaluated and found to provide appropriate surge protection.

a = Low-impedance low-side windings may be tested with a much faster 0.5 x 1.5 µs impulse wave on BIL ratings less than or equal to 30 kV.

b = A positive impulse wave shall be used.

c = The voltage crest of the chopped wave should be approximately the same as the full wave magnitude.

d = No chopped waves are required on 0.6 kV systems and below.

## Standard Transformer Ratings, Primary Voltage Class 2.3-46 kV

kVA 3 Phase			Secondary Voltage			
Self-Cooled	Fan-Cooled Ventilated Dry	Fan-Cooled Weather Resistant Ventilated	208Y/120 V 240 V Delta	480Y/277 V 480V Delta	4160Y/2400 V 4160 V Delta 2400 V Delta	600Y/277 V 600V Delta
225			X	X		X
300	400	400	X	X		X
500	667	667	X	X	X	X
750	1000	1000	X	X	X	X
1000	1333	1333	X	X	X	X
1500	2000	2000	X	X	X	X
2000	2666	2666		X	X	X
2500	3333	3333		X	X	X
3750	5000	5000			X	
5000	6650	6650			X	
7500	10000	10000			X	

The above combinations are based on standard designs. Other than standard designs may place further restrictions on the availability of voltage and kVA combinations. Consult factory for final determination.

## Altitude Derating Factor

Altitude (FT)	kVA Correction	BIL Correction
3300	1.00	1.00
4000	0.994	0.98
5000	0.985	0.95
6000	0.975	0.92
7000	0.966	0.89
8000	0.957	0.86
9000	0.948	0.83
10,000	0.939	0.80
11,000	0.930	0.77
12,000	0.921	0.75
13,000	0.912	0.72
14,000	0.903	0.70
15,000	0.894	0.67

Per IEEE 100m = 330 ft

# Other HPS Energy Efficient Products

## ENERGY EFFICIENT GENERAL PURPOSE DISTRIBUTION TRANSFORMERS

Generally used for supplying appliance, lighting, heating, motorized machine and power loads from electrical distribution systems.

Standard features include:

### HPS Sentinel®

- Meets C802.2 (2012) efficiencies per Canadian Energy Efficiency Regulations SOR/94-651

### HPS Sentinel® G

- Meets new DOE 2016/NRCAN 2019 & ON Reg. 404/12 efficiency standards
- 10kV BIL on all transformers

## ENERGY EFFICIENT K-FACTOR TRANSFORMERS

The use of K-factor distribution transformers has become a popular means of supplying power for non-linear loads such as electronic ballasts, drives, personal computers, telecommunications equipment, broadcasting equipment and other similar power electronics. These non-linear loads generate harmonic currents which can substantially increase transformer losses. Our K-rated transformers have been specifically designed to prevent failure due to overheating.

Standard features include:

### HPS Synergy®

- K-Factor ratings of K4, K9, K13 and K20
- Meets C802.2 (2012) efficiencies per Canadian Energy Efficiency Regulations SOR/94-651

### HPS Sentinel® K

- K-Factor ratings of K4, K9, K13 and K20
- Meets new DOE 2016/NRCAN 2019 & ON Reg. 404/12 efficiency standards
- 10kV BIL on all transformers

## ENERGY EFFICIENT HARMONIC MITIGATING TRANSFORMERS

HPS Harmonic Mitigating transformers reduce voltage distortion (flat-topping) and power losses due to current harmonics created by single-phase, non-linear loads such as computer equipment. They treat sequence harmonics (3rd, 9th and 15th) within the secondary windings and 5th and 7th harmonics upstream with appropriate phase shifting. Typical applications of severe non-linear loading conditions include data centers, internet-service providers, telecom sites, call centers, broadcast centers, etc.

Standard features include:

### HPS Centurion®

- Meets C802.2 (2012) efficiencies per Canadian Energy Efficiency Regulations SOR/94-651

### HPS Sentinel® H

- K-Factor rating of K13 (others available on request)
- Meets new DOE 2016/NRCAN 2019 & ON Reg. 404/12 efficiency standards
- 10kV BIL on all transformers

## ENERGY EFFICIENT DRIVE ISOLATION TRANSFORMERS

HPS drive isolation transformers are suitable for both AC and DC variable speed drives. They are sized to match standard motor horsepower and voltage ratings.

Standard features include:

- Three phase ratings from 7 kVA to 660 kVA
- Copper and aluminum available
- Optional shield available
- UL Listed and CSA Certified
- Type 3R enclosure (optional type 4, 12 or stainless)

### HPS Tribune™

- Meets TP1 and C802.2-12 efficiencies

### HPS Tribune™ E

- Meets NRCAN 2019 & ON Reg. 404/12 efficiency standards

## HPS ENDURACOIL™ CAST RESIN TRANSFORMERS

HPS EnduraCoil™ is a high-performance cast resin product designed for many demanding and diverse applications. Coils are precision wound with copper or aluminum conductors that are electrically balanced to minimize axial forces during short-circuit conditions.

Standard features include:

- kVA ratings from 300 to 3000 ANN, 4000 AFN, up to 34.5 kV Class
- Enclosure options (Type 1, 2, 3R, 3RE, 4, 12; other paint colors or stainless steel)
- Multiple standard options
- UL listed and CSA certified

### HPS EnduraCoil™

- Meets Canadian Energy Efficiency Regulations SOR/94-651 efficiency levels at 50% of rated load

### HPS EnduraCoil™ E

- Meets new DOE 2016/NRCAN 2019 & ON Reg. 404/12 efficiency standards

## HPS MILLENNIUM™ ENERGY EFFICIENT MEDIUM VOLTAGE DISTRIBUTION TRANSFORMERS

5 kV class transformers are designed to step down incoming high voltage power to utilize voltages for commercial, institutional or industrial applications.

Standard features include:

- Large variety of standard and custom single phase and three phase voltages and kVA ratings
- Standard primary voltages of 2400 and 4160 volts
- UL Listed and CSA Certified
- Type 3R and ANSI 61 enclosure (optional Type 4, 12; other paint colors or stainless steel)

### HPS Millennium™

- Meets CSA C802.2-12 efficiency standards at 50% of rated load

### HPS Millennium™ G

- Meets new DOE 2016/NRCAN 2019 & ON Reg. 404/12 efficiency standards
